#### Electro-Tech Machining obtains AS-9104A certification

Long Beach, CA – Electro-Tech Machining has announced the successful completion of an AS-9100:2004 audit and certification of the companies Long Beach operations. AS9100, which is an enhanced version of ISO9001:2000, is the quality standard among Aerospace companies and suppliers. The standard has over 90 additional requirements and amplifications of ISO9001:2000. These requirements focus on controlling and monitoring design, production, and purchasing processes. Electro-Tech Machining decided in early 2008 to upgrade its quality management system to meet the AS9100 requirements.

Upon receiving the new certification, Kevin McMahon, Vice President of Electro-Tech Machining, said, “The AS9100 certification enables Electro-Tech Machining to assure not only our Aerospace customers, but all of our customers, that the quality of our products and manufacturing capabilities exceeds industry standard”

A copy of ETM’s certification can viewed at: <http://www.etmgraphite.com/quality.htm>
